CIC-910A PSoC Training Lab

● Features

CIC-910A adopts cypress chip Cy8c27443 (28 pins) powerful harvard architecture processor with following specialized features:

1. M8C processor speed up to 24 MHz
2. Provide 12 analog and 8 digital PSoC blocks
3. 16K bytes flash program storage with 50,000 erase / write cycles
4. 256 bytes SRAM data storage
5. Making the best trade-offs between price and performance
